FJ-700 FLIPJACK

Four Channel Cell Phone Mixer

- Four channel Mixer
- Each input channel has switch selectable mic or line level input
- Each mixer input has balanced XLR connector and 1/4" unbalanced input for stereo or mono source.
- Easy-access battery compartment for 3 AA batteries and jack for external power.
- Works with most cell phones or with land line phone.
- Separate adjustments for Cell and Landline send and receive levels - Set once and forget.
- Four separate 1/4" headphone channels with separate volume controls.
- Separate source selection switches for "Host" headphone and for the three "Guest" headphone. Switches allow monitoring phone 'send' and/or 'receive' audio and external audio such as an off-air receiver. The Host channel can also be used as a cue channel for 2 of the inputs.
- Extra rugged metal package with "drop" protection for the switches and knobs.
- Separate line output jack to feed recorders, etc. The output is switch-selectable to be fed from the main mixer output, or the phone 'receive' audio.
- Internal side-tone level adjustment for cell phones that do not provide side tone (so speaker can hear himself in the headphones).
- Compact - 7.2" x 5.2" x 1.9"
- LED level meter, with low-battery indicator.
